

HALF MOON BAY Marina

Temporary Power Request Form

Berth: _____

Vessel Name: _____

I hereby request permission to have an unattended temporary power supply from the Marina Electrical Power supply to my vessel.

The temporary supply will be connected to one portable device only and will not be connected to any permanently installed onboard electrical supply.

Please detail what single appliance the power will be connected to:

The following conditions must be met to ensure compliance with the New Zealand Electrical Regulations & NZS:3760

- **Temporary Power leads must be of an approved type with a minimum waterproof rating of IP56 or greater**
- **The socket outlet shall be protected by either a 10amp Miniature Circuit Breaker (MCB) or Residual-current Circuit Breaker with Over-current Protection (RCBO)**
- **The supply lead must be free of any defects and have a current test tag affixed upon the lead conforming to NZS:3760**
 - All components of the supply lead shall be appropriately rated for the demands placed upon them.
 - The supply lead shall be in one continuous length, and shall not exceed 20 metres in length.
 - The power supply lead shall be a heavy duty tough rubber sheathed cable with all conductors including the protective earthing conductor integral within the sheathing.
- **The supply lead shall be arranged to:**
 - Permit normal movement of the craft at its mooring without placing undue stress on the power cable;
 - Prevent water flowing along the supply lead from reaching the appliance inlet;
 - Reduce the likelihood of the plug or appliance lead falling in the water;
 - Minimize the possibility of accidental disconnection.
- **Cables are to be laid in such a manner that they are prevented from being**
 - Displaced by movements of the vessel;
 - Damaged due to rubbing, chafing, crushing or kinking;
 - a tripping hazard to persons accessing the Pier.

Note: In the interests of everyone's safety unauthorised power leads will be disconnected without notice. Do Not use the cable whilst coiled up as this will generate heat, possible overheating and have potential to cause fire.

As the owner/agent of the above vessel I confirm I have read the above terms and conditions and further state that the power will be connected to one portable device only and shall not be connected to the vessel's hard wired onboard electrical system.

NOTE: The maximum permitted temporary power connection is limited to three (3) days, twice (2x) per calendar month. Power will be disconnected by Marina Staff at 1800hrs on the last day of approval. Unauthorised leads will be disconnected without notice.
